

Alcolizer Easy Check Portable Breath Alcohol Tester

Introduction

The Alcolizer Easy Check (EC) breath alcohol tester is a portable instrument that is simple to use and gives an accurate and reliable result at a reasonable price. It has a variety of applications and is ideal for the budget conscious buyer who is seeking quality and reliability. The EC is certified by Australian Standards.

Reliable Accuracy

The EC is designed and manufactured by Alcolizer Technology (AT), an Australian firm with a high reputation as a manufacturer of quality breath testers. The EC uses the same advanced sensor technology used for years in police breath testers worldwide, combined with the latest in microprocessor technology.

Easy to Live With

The Alcolizer Easy Check is small and uses 2 AAA alkaline batteries so that it can be used anywhere. Mouthpieces are supplied, and additional mouthpieces are available. AT provides a 2-3 day turnaround recalibration service – the EC even tells you when it is due!

Easy Operation

Simply push the button and observe the automatic circuit testing. The LCD shows “BLO” when the unit is ready. Just breathe into the mouthpiece for a few seconds until the audio tone signals that the test is complete. The blood alcohol content is indicated on the meter to the nearest 0.001%. The unit powers down to a low power mode after testing to save battery power. Note it does not turn off completely.

The Bottom Line

The Alcolizer Easy Check is an economic solution for personal breath-testing applications.
